

UTPAL NATH

Lead Quality Assurance Engineer | Performance & AI-Augmented Testing

Ph: +91-9638638838 sriutpalnath270@gmail.com [LinkedIn](#) [Portfolio](#) Bengaluru, India

Professional Summary

Results-driven QA professional with **4+ years of experience** at an MNC, specialising in **performance engineering, test automation, and AI-augmented quality assurance** for enterprise-scale applications. Proven track record of leading QA strategy end-to-end — from test architecture design and CI/CD integration to team mentorship and Grafana-powered dashboards for engineering and management stakeholders. Adept at transforming manual, siloed testing into **automation-first, data-driven QA frameworks** that cut release cycles and surface actionable insights. Seeking to drive quality innovation in AI-powered SaaS environments as a **Lead QA Engineer**.

Core Competencies

- Performance Testing (JMeter, k6, Gatling)
- LoadRunner Enterprise
- Selenium & Playwright Automation
- CI/CD Integration (Jenkins, GitHub Actions)
- Generative AI Test Generation
- Grafana & Performance Dashboards
- Test Strategy & QA Governance
- Agile / Scrum Methodology
- Team Leadership & Mentoring
- Jira, Zephyr, Test Management
- Python, SQL / PL-SQL
- API & Integration Testing

Professional Experience

Cognizant Technology Solutions

Quality Engineering Analyst (Associate)

Bengaluru, India

February 2022 – Present

Performance Engineering & Test Automation Lead across 15+ enterprise applications

- **Performance Testing Leadership:** Designed and executed **200+ performance test scenarios** using JMeter and LoadRunner across 15+ enterprise applications, reducing average response time from 4.2s to 2.7s (**35% improvement**) and sustaining **99.9% system uptime**.
- **High-Scale Load Testing:** Conducted load simulations with **10,000+ concurrent users**, proactively identifying 95% of performance bottlenecks before production deployment.
- **Test Automation Framework Architecture:** Built **8 Selenium-based automated test frameworks** covering 5,000+ test cases, cutting manual testing effort by 60% and reducing release cycles from 10 days to 6 days.
- **Generative AI Integration:** Pioneered **GenAI-powered test case generation** tools that produced 3,000+ test cases, expanding coverage from 72% to 89% and improving defect detection by 45%.
- **CI/CD Pipeline Integration:** Integrated **50+ automated test suites** into Jenkins CI/CD pipelines, cutting deployment time from 4 hours to 2 hours and enabling 3× more frequent releases.
- **Observability & Reporting:** Built Grafana dashboards surfacing real-time performance metrics and test insights to engineering and management stakeholders for data-driven decision-making.
- **Team Development & Mentoring:** Trained and upskilled **8 junior QA engineers** in JMeter scripting, Selenium framework development, and performance testing best practices over a 6-month programme.
- **Shift-Left Quality:** Participated in Agile sprint ceremonies, embedding quality checks into test planning, test case reviews, and UAT coordination across 3+ product release cycles.

The Sparks Foundation

Data Science & Data Analyst Intern

Bengaluru, India

July 2020 – September 2020

- Applied data analysis and visualisation techniques to derive actionable insights from structured datasets.
- Gained foundational experience in Python-based analytics, reinforcing the data-driven quality mindset that underpins current QA practice.

Key Achievements & Impact

35% Faster Response	Reduced enterprise application response times from 4.2s to 2.7s via targeted JMeter bottleneck analysis and tuning.
60% Less Manual Effort	Automated 5,000+ test cases across 8 frameworks, significantly reducing manual testing effort and shortening release cycles.
45% Better Detection	GenAI-generated test suites increased the defect detection rate and expanded test coverage from 72% to 89%.
3× Release Velocity	CI/CD-integrated test suites halved deployment time from 4 hours to 2 hours and tripled release frequency.
Team Scaling	Built QA capability across 8 engineers in 6 months through structured mentoring and hands-on coaching programmes.

Technical Skills

Performance Testing	JMeter, k6, Gatling, LoadRunner, Apache Bench
Test Automation	Selenium WebDriver, Playwright, TestNG, pytest
CI/CD & DevOps	Jenkins, GitHub Actions, Git, Bitbucket
AI & Analytics	Generative AI Test Generation, Python, SQL / PL-SQL
Monitoring	Grafana, InfluxDB, Performance Dashboards
Test Management	Jira, Zephyr, TestRail, Test Plans & Traceability
Cloud & SaaS	Exposure to AWS / Azure, SaaS application testing
Methodologies	Agile (Scrum), Shift-Left QA, BDD, API Testing

Why I Am the Right Fit for SymphonyAI

SymphonyAI’s vision of an **AI-first, automation-first QA team** is exactly the culture I have been building throughout my career. My experience maps directly to the Lead QA role:

- **Test Strategy & Governance:** Owned test plans, defect management, and traceability matrices across enterprise delivery projects, directly aligning with SymphonyAI’s QA governance requirements.
- **Automation & GenAI:** Hands-on Selenium frameworks, active Playwright upskilling, and live GenAI test generation implementations — uniquely positioned to lead the AI-first automation mandate.
- **Performance & SRE Collaboration:** JMeter, k6, and Grafana expertise enables effective partnership with SRE and SaaS Ops teams for production readiness and resilience validation.
- **Team Leadership & CI/CD:** Proven track record mentoring 8+ QA engineers and integrating 50+ test suites into Jenkins/GitHub Actions pipelines for continuous delivery.

Education

Bachelor of Technology (B.Tech) — Computer Science (Internet of Things)	2017 – 2021
Jain (Deemed-to-be University), Bengaluru	
Class XII — Science with Computer Science	2005 – 2017
Kendriya Vidyalaya	

Certifications & Professional Development

- Actively upskilling in **Python, Data Analysis, AI-Augmented Testing, and Cloud platforms (AWS / Azure)** to stay at the forefront of Quality Engineering.
- Practical experience applying **Generative AI (LLMs) for test case generation**, automation workflows, and modern SRE / DevOps practices.
